This unique certificate also makes it easier for professional and academic institutions to assess with credibility and high quality the level of candidates through a standard test that covers all the skills in the Arabic language. TAGI-UNI designed and developed this test to be the most professional tool for determining the level of candidates in Arabic language with the utmost accuracy and objectivity.

About the Arabic Fluency Test

It is a tool and systematic process to measure the learning outcomes of candidates and their Arabic linguistic and cultural knowledge. It is a standardized test that measures the ability of candidates to benefit from their study of the Arabic language, and identifies the extent of their familiarity with its rules and principles.

This test measures a wide range of the Arabic language content: the extent to which the candidates are able to read, their knowledge of the vocabulary, grammar, in addition to their ability to listen, speak and write in Arabic. It has been prepared by specialized professionals, applied in standard conditions and corrected in a professional way. It is standardized and comprehensive covering all parts and sections of the Arabic language. It is a test that determines the linguistic level of native Arabic speakers and non-native speakers. It conforms to the standards of the Common European Framework of Reference (CEFR), taking advantage of the American Council on the Teaching of Foreign Languages (ACTFL) guidelines, and taking into consideration the specificity of the Arabic language. The test is carried out with a high degree of stability under a neutral supervision and with the utmost accuracy and objectivity.

The Importance of Learning Arabic Language

Arabic is one of the most widely used languages in the world, and one of the basic tenets of Arab identity. It is the official language of the Arab countries and the language of the Holy Quran, for all Muslims, regardless of their nationality, place of origin, and native language. The Arabic language is the gateway to the heritage and civilization of the Arab and Islamic region, which is full of monuments and traces of ancient and historical civilizations that have inhabited this region. Also, it has been the language of scientific and cultural communication for a long time, and it has been the spoken language of many scholars and thinkers all over the world.

It is necessary to strengthen the presence of the Arabic language in the world, and to give it more attention and care. It is characterized by an unlimited flexibility to express the diverse human knowledge. Indeed, the Arabic language is very rich in vocabulary and expression that have produced poetry, distinguished literature, and great scientific and intellectual achievements.

Importance of the Arabic Language Fluency Exam

The existence of a standardized and unified testing of the level of fluency in the Arabic language enhances the structure of this language and elevates it to a greater world-class level. While most of the prior methods of addressing the reality of the contemporary Arabic language turned to the nature of curricula only, the Arabic Fluency Test is a tool for the protection of the Arabic language and one of the strategies to promote the language in the Arab world as well as internationally, in addition to employing the technology necessary to serve it. It ensures the measurement of the levels of students and learners of the Arabic language from native or non-native speakers transparently and objectively, and thus can be used to assess their linguistic level anywhere around the world. Accordingly, it represents a tool to protect classical Arabic from any distortion or neglect, especially given the neglect nowadays, such as teaching a foreign language and replacing the daily use of Arabic with foreign words without taking care of Arabic language

At the same time, the Arab countries have been receiving many expatriates from all over the world for various purposes, whether students, tourists or investors, which requires a standardized test that measures language proficiency of non-native Arabic learners with impartiality and objectivity.
