

Cybersecurity Audit and Penetration Testing Services

International Standards Implementation Services

Due to our recognized expertise in internationally adopted standards such as PCI DSS, ISO27001 and ISO9001, we are able to offer an integrated approach to compliance.

Independent and unbiased services are provided as we are not affiliated to any Cybersecurity solution

Customized Reports for internal use (i.e. Top management, Technical staff) or external use (i.e. legislative, licensing entities)

Training and knowledge transfer

We offer Cybersecurity and ISO 27001 training courses (both classroom and in-house) for all staff, from basic foundation level through to advanced courses for IT practitioners and lead implementers seeking implementation of or certification to various standards including ISO27001 and PCI DSS.

Tangible ROI

TAG-ITI's deep technical knowledge and expertise deliver insight and advice that is not available through off the - shelf technical solutions. TAG-ITI can help organizations reduce their total cyber security expenditure, while increasing its effectiveness and return on investment.

Cybersecurity Audit

TAG-ITI offers thorough cybersecurity audit designed to provide you with a complete view of your system's strengths and vulnerabilities from an unbiased, expert perspective. TAG-ITI cybersecurity audit are entirely customized to your business.

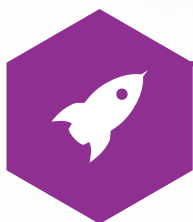

Penetration Testing

Penetration testing is a process whereby an expert 'Ethical Hacker' seeks to gain access to your systems, revealing areas of weakness and making suggestions for improvements.

We offer Black Box pen-test, White Box pen-test, or something in between, bespoke to your requirements. Extending this test to websites, web applications, web services, mobile apps and public facing internet IP addresses, with competitive prices available for annual subscriptions

Vulnerability Assessment

Standardized vulnerability assessments and tests that are based on a defined set of criteria, at affordable and fixed prices.
