MESSAGE FROM THE CHAIRMAN

TO OUR PROSPECTIVE STUDENTS

Talal Abu-Ghazaleh University College for Innovation (TAGUCI) is a unique University College specializing in preparing the young Arab generation with the required skills to become the leaders in the new world of information technology.

TAGUCI will instill in students a solid foundation in the most recent academic and practical knowledge in the ever-changing field of information technology focusing on artificial intelligence and other newly emerging world changers.

Our students have the opportunity to benefit from internships at Talal Abu-Ghazaleh Organization and acquire hands-on experience working with our specialists in their fields of specialization.

I invite our future leaders to explore the various specialized fields of knowledge that we offer and that were designed by our experts, and I will not spare any resource required for their success in this unique University College.

We are opening the path to the new world of technology.

Talal Abu-Ghazaleh

Chairman of Talal Abu-Ghazaleh Organization

Talal Abu-Ghazaleh University College for Innovation

Vision

To be the leading institution in growing, enabling and enhancing innovation and to lead advancement in business and information technology.

Mission

Equip students with premier technical and life skills to innovate and spearhead advancement in the fields of business and information technology.

ABOUT TAGUCI

The University College was established in 2018 as an independent University College accredited by the Ministry of Higher Education in Jordan. Our programs have been developed with the advancement in communication and information technology in mind by the most respected and renowned figures in academia. All programs have been designed to bolster the advancement of technical knowledge with practical real-world applications and through the case study approach where appropriate.

TAGUCI is the only major institution in the Arab world specializing in teaching applied information technology. Our academic programs are supplemented by internships at Talal Abu-Ghazaleh Organization that practices all the disciplines taught in the University College.

TAGUCI's aim is to prepare students for leadership positions in their specialized fields. We are committed to always develop new programs that help our students meet the demands of the ever-changing global economy.

To help achieve our goal of encouraging innovation, TAGUCI will offer any student who develops a patentable innovative project a grant that covers the cost of their tuition once over. Furthermore, Abu Ghazaleh Intellectual Property (AGIP), the largest Intellectual Property Company in the world, will assist in registering their patent for them.

Degrees Offered

The following undergraduate programs are to be offered, leading to bachelor's degrees:

INNOVATIVE BUSINESS

with tracks in:

- a. Digital Marketing
- b. Accounting and Auditing

INNOVATIVE COMPUTER SCIENCE

with tracks in

- a. Artificial Intelligence
- b. Data Science
- c. Cyber Security

BACHELOR DEGREE IN INNOVATIVE BUSINESS

The Bachelor of Innovative Business is designed to provide students with knowledge in a variety of core business areas with focus on innovation.

a. Digital Marketing Track

The Digital Marketing track empowers graduates to think strategically and tactically. Graduates will be able to design effective digital strategies, support and track efforts across the organization, and synthesize data for a host of issues such as measuring the return on investment.

b. Accounting and Auditing Track

The Accounting and Auditing track is designed to provide students with the technical, professional, and ethical skills needed to perform financial audits in all fields. Students receive training in taxation laws, financial regulation, and advanced mathematics. Aspiring auditors should place particular emphasis on courses that cover taxation laws, internal financial assessment strategies, information systems, external reporting and fraud investigations.

While enrolled in the accounting program, students learn to read spreadsheets and utilize databases to organize and analyze financial data and records. They also study microeconomics and macroeconomics and gain an understanding of financial trends.

BACHELOR DEGREE IN INNOVATIVE COMPUTER SCIENCE

The mission of the undergraduate program in Innovative Computer Science is to develop students' breadth of knowledge across the subject areas of computer science, including the ability to apply the defining processes of computer science theory, abstraction, design, and implementation to solve problems in the discipline.

After learning the essential programming techniques and the mathematical foundations of computer science, students partake in courses in programming techniques, complexity theory, systems programming, computer architecture, analysis of algorithms, artificial intelligence, and applications among others.

a. Artificial Intelligence Track

The (AI) track focuses on the development and analysis of algorithms that learn and/or perform intelligent behavior with minimal human intervention. These techniques are applied to a broad range of problems in robotics, e-commerce, medical diagnosis, gaming, mathematics, and military planning and logistics, to name a few. Within this track there are several possible sub-disciplines include: robotics, natural language processing (NLP), computer vision, computational biology, and e-commerce. Students gain experience in estimation theory, mobility mechanisms, multi-agent negotiation, natural language interfaces, machine learning, active computer vision, probabilistic language models for use in spoken language interfaces, and the modeling and integration of visual, haptic, auditory and motor information.

b. Data Science Track

The Data Science track is designed to train students to become tomorrow's leaders in this rapidly growing area. Through a combination of interdisciplinary coursework and cutting-edge research, the program will enable students to apply techniques and tools of data science to applications drawing on the appropriate and relevant concepts and models from the engineering, natural, and social sciences.

Graduates will be uniquely positioned to pioneer new developments in the field, and to be leaders in industry, public sector, and academia.

c. Cyber Security Track

Employment in the computer security field is rapidly growing. Career opportunities are booming for computer security analysts, Web security administrators and computer crime investigators. As reliance on computers increases and technology grows more sophisticated, the need for cyber security experts becomes critical to protect users and keep personal information out of the hands of hackers.

The program prepares students for career opportunities in the cyber security field, including positions as cryptanalysts, cyber law-enforcement specialists, security administrators, computer crime investigators and computer forensic specialists. Students gain the knowledge and skills to be information security managers, information assurance consultants and business security-system analysts. Through specialized courses in cyber networking and criminal justice. Students are prepared to become forensic specialists, forensic technology consultants, technology risk-management professionals, and Internet forensic specialists.

Accreditation of Talal Abu-Ghazaleh University College for Innovation

► Amman

Talal Abu-Ghazaleh University College for Innovation has obtained the general accreditation by virtue of the decision of the Jordanian Accreditation and Quality Assurance Authority.

Talal Abu-Ghazaleh University College for Innovation is a college of business and information technology. The first university of its kind, TAGUCI will graduate inventors.

His Excellency Dr. Talal Abu-Ghazaleh said that the establishment of a university college for innovation is a necessity for all countries at the current time, pointing out that the basis of its work is the graduation of those who will be equipped to create knowledge-based inventions.

Dr. Abu-Ghazaleh asserted that reliance on the pillars of quality will push progress to more advanced levels, which will prepare the educational institutions in the region to create a society that produces knowledge, thus ensuring the transformation of the civil state into an innovative state.

The College announces the opening of the registration and reception of applications via its website at the start of coming June for the academic year 2018/2019.

Cooperation Agreement between Talal Abu-Ghazaleh University College for Innovation and Queen's University Belfast, UK

► Belfast

On behalf of HE Dr. Talal Abu-Ghazaleh, Dr. Muntaha Bani Hani, college dean of the Talal Abu-Ghazaleh University College for Innovation, participated in the Jordanian Leaders Training Forum.

The forum was held at Queen's University Belfast, with the aim to strengthen relations between the University and Talal Abu-Ghazaleh University College for Innovation.

On the sidelines of the forum, an agreement was signed between the University and Talal Abu-Ghazaleh University College for Innovation, under which a discount will be given to its students to complete their higher education at Queen's University Belfast.

This agreement marks the beginning of future cooperation between the university and the college and the support and development of the future relations between the two parties.

It is worth noting that Talal Abu-Ghazaleh University College for Innovation is a college of business and information technology. It is the first university college of its kind in Jordan, which specializes in the development of creativity and innovation.

The College announces the opening of the registration and reception of applications via its website at the start of coming June for the academic year 2018/2019.

THE JORDAN TIMES

Leading youth to join a “brave world” of knowledge

Talal Abu-Ghazaleh Organisation’s ‘inventors university’ to open doors in September

► Amman

What does it take to become an inventor that can make a difference?

After all, the prosperity of an entire country might be a good invention away, says Talal Abu-Ghazaleh, founder and president of Abu-Ghazaleh Organisation (TAG-Org), a knowledge-based group and a world leader in the services it offers.

After more than 45 years of serving the knowledge cause and in light of his deep insight of what is missing in the process of creating creative people, Abu-Ghazaleh will inaugurate Talal Abu-Ghazaleh University College for Innovation (TAGUCI, taguci.edu.jo), in September this year as a not-for-profit institution and part of TAG-Org’s corporate social responsibility.

In an interview at his office last week, Abu-Ghazaleh said TAGUCI will provide the answer to the above question due to the uniquely huge and plentiful sources his group possesses; it will harness these capabilities to render the college a unique educational facility on an international level.

Above all, the mind behind TAG empire is

personally behind this project, with his long experience and ability to transform visions into facts on the ground.

The first realisation came to Abu-Ghazaleh in 1965, when he attended a conference on intellectual property (IP) rights in San Francisco.

“The concept of IP was new to me then, but I came up with the conclusion then that [IP rights] protection is the basic requirement for innovation.”

Fifty-three years after that event, TAG-Org is now

the world's largest IP protection company, with its operations sprawling across the globe through more than 100 offices. These branches also offer an assortment of other professional services such as auditing and translation, among others, and run not-for-profit programmes aimed at serving the communities where they are located.

TAGUCI students will find this nowhere else, according to the group's president. When they graduate with their inventions, Abu-Ghazaleh Intellectual Property, a component of the group, will help them register patents and protect their innovations, but way before that, students will be trained on drafting patent proposals, which is an essential skill for any inventor.

Their instructors will give them access to a state-of-the-art education in their fields and coach them to ensure that their ICT-based inventions meet the criteria of success: novelty, practicality, usefulness and protectability in terms of IP rights.

The invention is the sole threshold to graduation and when they achieve the required excellence, the university will refund all the tuition fees they will pay.

The pursuit of excellence, according to Abu-Ghazaleh, starts from the admission stage. To be accepted, applicants have to pass an English proficiency test, TAG's ICT skills test and a personality test, because, according to TAG-Org president, there are certain personal qualities that are essential to tap the potential of would-be inventors.

Why only ICT? Responding to this question, Abu-Ghazaleh said that currently, the most valuable companies in the world are ICT giants, like Google. The future is all about information technology and knowledge, he stressed.

In fact, Abu-Ghazaleh's future vision has made its way to a new publication by the knowledge

leader. The first draft of his book "A Brave World" is ready and will be released in both Arabic and English. The Jordan Times has had access to the English draft, which is expected to be printed by Harvard University Press.

In the introduction, the author says: "The current age of technological advancement is giving birth to various disruptive technologies of the future. This refers to innovations that will cause major changes in the lives of mankind, from the ways in which businesses operate, healthcare is delivered, governments are run, to how citizens live their lives and everything in between."

The book, which sketches a picture of how the world would look like in 50 years, discusses prospects of technological advancements in the coming decades, focusing on the Internet of things, robotics, artificial intelligence, 3D printing, automated knowledge systems, social networks, the cloud, cellular technologies, cryptocurrency, the blockchain, digital commerce and a dozen other topics concerning the various fields that will rely heavily on ICT, including education, medicine, defence, auto industry and others.

Through TAGUCI, Abu-Ghazaleh seeks to take young people by the hand and lead them into this future. This does not stop at the invention and the patent, of course. He said that the university will encourage commercially viable inventions and use its vast network of corporate clients to market promising ones, "without benefiting itself from the deals financially".

Even before the university opens its doors in Amman, four Arab countries have shown interest and want similar facilities for their young generations, including Palestine, Lebanon, Iraq and the UAE. Abu-Ghazaleh said he is happy with that interest because "I have always believed in the potential of the Arab nation and I know that the future is for this region".

Accreditation of Talal Abu-Ghazaleh University College for Innovation

► Amman

Talal Abu-Ghazaleh University College for Innovation (TAGUCI) organized an education fair at Talal Abu-Ghazaleh Knowledge Forum targeting high school students to promote and introduce the College programs and the process of admission.

The Fair was attended by parents and students who showed interest in the creative and innovative programs of the College and its unique vision in graduating inventors.

Dean of TAGUCI, Dr. Muntaha Bani Hani, gave an introduction about the College, its vision, programs and the process of admission which includes a series of exams and interviews to assess the creative abilities of the students who would join the College.

She briefed the attendees on the bachelor's programs which include A Bachelor's Degree in Innovative Computer Science in three tracks: Artificial Intelligence, Data Science and Cybersecurity. She also underlined the

Bachelor's Program in Innovative Business and its tracks including Digital Marketing as well as Accounting and Auditing.

During the presentation, Bani Hani highlighted the main aspects that distinguish TAGUCI, as a business incubator that also provides practical training opportunities and internships at Talal Abu-Ghazaleh Organization (TAG-Org) and the many other contracted institutions with TAG-ORG. TAGUCI will also be committed to provide its graduates with employment opportunities. The College opened registration and started receiving applications for the academic year 2018/2019 via its website at the beginning of last June.

Talal Abu-Ghazaleh University College of Innovation is a university college specialized in business and information technology. It focuses on providing the appropriate environment for creativity and innovation through modern learning methods while granting students the potentials to transform their ideas and inventions into marketable products.

Abu-Ghazaleh Talks to The Jordan Times about TAG-Org's University for Inventors, his New Book

► Amman

Dr. Talal Abu-Ghazaleh spoke about his vision for his “university for inventors”, which will open its doors in September, and on how to tap the potential of innovative youth to steer the region, and become a key player in the future of humanity.

In an interview with The Jordan Times, published under the title: Leading youth to join a ‘brave world’ of knowledge, Abu-Ghazaleh stressed that non-for-profit Talal Abu-Ghazaleh University College for Innovation (TAGUCI) offers students a full package designed to render them full-fledged inventors that can make a difference to their communities and the world at large.

This integrated system of incubation, according to His Excellency, “can be found nowhere in the world, simply because it is offered by TAG-Org, the world’s leader in intellectual property”. This ensures students access to the state of the art, so that they will know where and how to start and where to go, while they will be taught by IP experts on patenting and drafting patent proposals.

AGIP, which is TAG-Org’s IP arm, will handle the protection of the ICT-based inventions, while the group will help market commercially viable ones, harnessing its vast network of corporate clients worldwide.

Above all, the newspaper stressed, the TAGUCI’s students are privileged to have at their service the deep insight and unrivalled vision of HE Dr Talal Abu-Ghazaleh, described by The Jordan Times as a world-class knowledge leader who knows where the trajectory of ICT advancements is heading, and so is able to lead the young generation to focus on things that matter and have value as contributions to human civilization and the future of the planet.

The newspaper noted that through TAGUCI, “Abu-Ghazaleh seeks to take young people by the hand and lead them into this future”, adding that four Arab countries have already shown interest and want similar programs for their young generations, including UAE, Palestine, Iraq and Lebanon.

On another subject, Abu-Ghazaleh spoke about his book, “A Brave World”, whose first draft is ready, and will be released in both Arabic and English soon.

The book, which sketches a picture of how the world would look like in 50 years, discusses prospects of technological advancements in the coming decades, focusing on the Internet of things, robotics, artificial intelligence, 3D printing, automated knowledge systems, social networks, the cloud, cellular technologies, cryptocurrency, the blockchain, digital commerce and a dozen other topics concerning the various fields that will rely heavily on ICT, including education, medicine, defence, auto industry and others.
